

MUHAMMAD HUZAIFA SHAFIQ

Junior Data Scientist | Data Analyst | Machine Learning

+92-334-6971121 | huzaifashafiq2024@gmail.com | linkedin.com/in/huzafa05 | github.com/huzafa-006 | Islamabad, Pakistan

PROFESSIONAL SUMMARY

Computer Science graduate (2025) focused on data analysis and machine learning. Built end-to-end projects covering data cleaning, EDA, statistical analysis, feature engineering, regression and classification models, Tableau and Streamlit dashboards, and an NLP deep-learning system (XLNet). Internship experience with Docker and GitHub Actions CI/CD. Seeking a Data Science, Data Analyst or ML internship, trainee or junior role.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, EDA, Feature Engineering, Statistical Analysis

Machine Learning: Scikit-learn (Regression, Classification, Model Evaluation), NLP, XLNet (deep learning)

Visualization & BI: Matplotlib, Seaborn, Plotly, Tableau, Streamlit

Tools: SQLite, PostgreSQL, Jupyter Notebook, VS Code, Git, GitHub, Docker, GitHub Actions

PROJECTS

Employee Attrition Analytics

github.com/huzafa-006

Python, Pandas, NumPy, Seaborn, Scikit-learn, SQL (SQLite), Tableau

- Built an end-to-end HR analytics project to measure attrition rate and identify factors linked to employee turnover (department, job role, overtime, satisfaction, salary, promotion history).
- Performed data quality checks, cleaning, EDA, statistical comparisons and feature engineering; framed attrition as a **binary classification** problem and evaluated ML models with feature importance.
- Wrote SQL queries for HR analysis and designed an interactive **Tableau dashboard** with business recommendations.

HateShield AI — Hate Speech Recognition (Final Year Project)

Jun 2024 – Jul 2025

Python, XLNet, NLP, Django, Flask API, React.js, PostgreSQL, Docker

- Developed a system that detects and classifies hate speech in English text using a **custom XLNet model with an attention mechanism**; cleaned and preprocessed text datasets with NLP techniques.
- Served the model through a Flask API within a full-stack app (React.js, Django, PostgreSQL) with file upload, result visualization and user feedback collection.
- Containerized all services with Docker and automated build and deployment with a GitHub Actions CI/CD pipeline.

House Price Prediction Dashboard

github.com/huzafa-006

Python, Pandas, Scikit-learn, Streamlit, Plotly, Joblib

- Cleaned and analyzed a 545-property housing dataset; applied feature engineering and StandardScaler, and trained a Linear Regression model ($R^2 = 0.653$).
- Deployed the model in an interactive Streamlit dashboard with Plotly charts, prediction history and CSV export.

Sales Data Analysis & Student Performance Analysis

github.com/huzafa-006

Python, Pandas, NumPy, Matplotlib, Jupyter

- Cleaned raw sales data (datetime conversion, currency-symbol removal, type fixes), engineered date features and analyzed revenue by product, city, salesperson and weekday; ran EDA on student performance data and presented findings with Matplotlib.

EXPERIENCE

DevOps Engineer Intern — InoTech Solutions (Pvt) Ltd

Nov 2025 – Jan 2026

Rawalpindi, Pakistan · On-site

- Built and managed Docker containers for application deployment and testing; configured multi-container environments with Docker Compose.
- Automated Docker image build and deployment workflows using GitHub Actions and applied DevOps practices to improve deployment workflows.

EDUCATION

BS Computer Science — PMAS Arid Agriculture University, Rawalpindi

2021 – 2025
